

# Recycled Paper

## What is recycled Paper

Most of the paper used has been made from wood fiber (Trees). Recycled paper is made from discarded wastepaper generated by homes and businesses. Recycling occurs when the recyclable materials collected are made into a product that is actually used.

## Why Recycled Paper ?

Recycled paper uses less natural resources and less toxic chemicals in paper making process.

It has been reported that **One Tonne** of paper made from 100% wastepaper, rather than from virgin wood fiber :

- Saves about 15 trees
- Saves about 2,500 Kwh of energy
- \* Saves about 20,000 liters of water
- \* Reduces about 25 kilograms of air pollutants.

**\* Reduce the use of paper, Reuse the paper & paper products where ever possible**

**\* Try to use Recycled Paper and Recycled Paper Products.**

**Let Us Protect Earth to Protect Life**
